FOR IMMEDIATE RELEASE

Valley Regional Transit to offer free WiFi on ValleyRide buses

Free WiFi service will be available on all ValleyRide buses beginning **Monday, January 30th**, Valley Regional Transit has announced.

To access the service, users will need to go to “settings” on their device and click on “Valley Regional Transit Wireless.” After agreeing to the terms of use, the passenger will be directed to the real-time bus locator home page. From there, the user will be able to access websites.

The WiFi service will have filters in place to block access to inappropriate material for family orientated surroundings.

ValleyRide bus services are managed by Valley Regional Transit, the regional public transportation authority for Ada and Canyon counties. ValleyRide bus services includes 18 fixed routes in Boise/Garden City, five fixed routes in Nampa and Caldwell, and six inter county routes between Ada and Canyon counties.
